

Emergency Medical Services

Certificate, Diploma or Associate Degree available

NGTC's Emergency Medical Services (EMS) program prepares students to provide emergency medical care and transportation for critical and emergent patients who access the emergency medical system. EMS professionals function as part of a comprehensive response team, under medical oversight, and are a direct link from the scene to the emergency health care system. These individuals are tasked with performing medical interventions with the basic and advanced equipment typically found on an ambulance. Students earning the EMS Professions (EMSP) Diploma are prepared to move fluidly into training to become a Paramedic at the diploma or degree level.

Available on the Blairsville and Clarkesville campuses

Available Programs:

- Paramedicine Degree or Diploma
- EMS Professions (EMSP) Diploma
- Advanced EMT (AEMT) Certificate
- Emergency Medical Technician (EMT) Certificate
- Pre-Hospital EMS Operations (EMT & AEMT) Certificate

Successful completion of the certificate, diploma or degree programs allow graduates to take the National Registry of EMT (NREMT) certification examination(s) and apply for GA licensure as an EMT, AEMT or Paramedic.
