

Environmental Technology

Associate Degree available

Do you love the great outdoors? Are you looking for a career that takes you out of the office and into the field? The Environmental Technology program offers a solid foundation for careers in managing wildlife and fish populations as well as aquaculture, dendrology, and environmental ethics. Students in the program get hands-on experience that augments classroom instruction. Throughout the course of study, there are opportunities to work on collaborative projects with local and state environmental groups.

The Environmental Technology associate degree offers specialized training to those who are interested in employment in a natural resource or environmental science related field.

 Available on the Clarkesville campus

Coursework includes:

- Computer Applications
- Biology
- Chemistry
- Ecology
- Extensive array of detailed environmentally-specific classes

The courses in the Wildlife and Fisheries Management specialization meet the requirements that the Georgia Department of Natural Resources has established for wildlife and fisheries technicians and conservation rangers.
