

Federal regulations require colleges to disclose information regarding their occupational programs that require a state licensure to be employed, and the status of the program for meeting an individual state’s licensure requirements. To determine if a program meets state licensure requirements, locate the program of choice, and view the status that program has for the state you are located. If the state you are located in does not appear in the meets program licensure requirements field, then we cannot guarantee the program of study will be able to lead you to a state occupational licensure in your state.

Program Leading to Licensure	States in which Program meets Licensure Requirements	States in which Program does NOT meet Licensure Requirements	States in which it has not been determined if Program meets Licensure Requirements	Notes and Additional Links
